

Artificial Penetration No. 764

Humble Oil & Refining Co.
Chesson "A" #13

FORM 100-1 RECEIVED

Austin, Texas

NOTIFICATION OF INTENTION TO DRILL, DEEPEN, PLUG OR SHOOT

NOTIFICATION OF INTENTION TO DRILL, DREDGE, OR CONSTRUCT
(To comply with Orders of the Railroad Commission of Texas, governing Oil and Gas Operations in Texas.)

In order that the well covered by this notice may be definitely and accurately located on maps in the office of the Commission, draw in the space below, in ink, a sketch of the lease or block and lot, giving name and number, and indicate thereon the exact location of the well. Also show the distance, in feet, of the well from the two nearest boundaries of the lease, and from the nearest well. Give names of the adjoining lease or property owners.

Scale: 400 feet to 1 inch. If less than 2 acres,
40 feet to 1 inch.

Use back hereof for sketch if necessary.

976 ft. North

Rule 27. No well for oil or gas shall hereafter be commenced nearer than three hundred (300) feet to any other completed or drilling well on the same or adjacent tract or farm; and no well shall be drilled nearer than one hundred and fifty (150) feet to any property line; provided, that the Commission, in order to prevent waste or to protect vested rights, will grant exceptions permitting drilling within shorter distances than as above prescribed, upon application filed fully stating the facts, notice thereof having first been given to all adjacent leasees affected thereby. Rule 27 shall not be the ground to be entered within any proven oil field which is on a proven oil lease.

BOTTOM OF HOLE:

RAILROAD COMMISSION OF TEXAS

10. Plugging Dry and Abandoned Wells.—(a) All abandoned or dry wells shall immediately be plugged by the owner or operator to the top of the casing or to the top of the hole, as directed by the Commission, and the plug shall be made of cement and sand, and shall be made in accordance with the rules and regulations of the Commission. In case of a well which is plugged to the top of the casing, the plug shall be made of cement and sand, and shall be made in accordance with the rules and regulations of the Commission. (b) Notwithstanding the above, the owner or operator of a well which is plugged to the top of the casing, may, at his option, plug the well to the top of the hole, and in such case the plug shall be made of cement and sand, and shall be made in accordance with the rules and regulations of the Commission. (c) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (d) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (e) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (f) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (g) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (h) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (i) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (j) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (k) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (l) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (m) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (n) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (o) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (p) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (q) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (r) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (s) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (t) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (u) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (v) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (w) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (x) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (y) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with. (z) The owner or operator of a well which is plugged to the top of the casing, shall, in addition to the plug, place a concrete or masonry cap over the well, and shall place the cap in such a position that it shall not be removed or tampered with, and shall place the cap in such a position that it shall not be removed or tampered with.

PLUGGING RECORD

Company.....Humble Oil & Ref. Co.....Address.....Houston, Texas.....

Sec. No.....Blk. No.....Survey.....Ed. DYNOR L. Co.....County.....Orange.....

Well No.....13.....Name of Lease.....O. GHERSON "A".....No. of Acres.....
